Our office will be closed
July 3 & 4 in observance
of the holiday.

Jon - Lead Technician

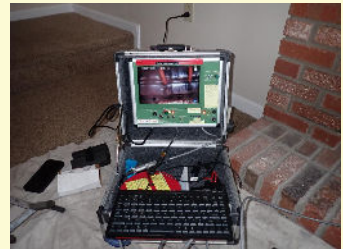

NH Gas Licensed
CSIA Certified Chimney Sweep

A fan of action movies, Jon arrived to the Crown Chimney "cinema" in 2022. Jumping right into action, he received his certification and morphed into a lead role. While we're an ensemble cast, he's proving his heroic abilities (and mechanical inclination) to hit targets, outsmart challenges, tackle stunts and dominate the chimney business. Jon is results-oriented and enjoys the satisfaction of teaching customers about safe and proper venting as well as goal oriented to see his transformative achievements! We love the plot line of this epic adventure and can only ask ourselves one question ... DO WE FEEL LUCKY? Yes we do! Jon's "up, up and away" on a fast-paced, successful career adventure and we have no doubt that future sequels will sweep us off our feet!

Lucky Cricket

Charles Dickens, a 19th century author, titled one of his novels: A CRICKET ON THE HEARTH. The book suggests that placing a brass cricket by the fireside will "ward off ill fate" and "ensure a safe and happy "Home Sweet Home."

Level II Inspection

An inspection of a flue that incorporates the use of video scanning equipment is called a Level II Inspection. A Level II Inspection is performed for relining/replacement of flue lining, sale of property/transfer of ownership, operating malfunction or external event such as a chimney fire, fallen tree or lightning strike. We have the tools and talent to offer peace of mind - *give us a call to book your Level II Inspection or annual Level 1 Inspection today and prepare for the upcoming burn season - appointments are filling quickly!*
